

Why Give?

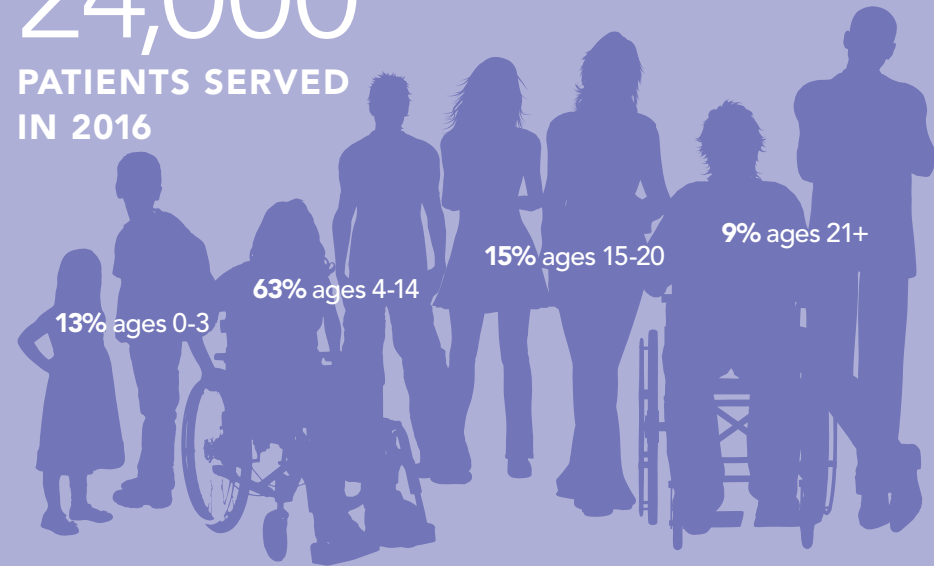

Thanks to you, our donors, we were able to treat more than 24,000 patients in 2016. Your generosity allowed our faculty members to diagnose dozens of rare diseases—some never before identified—and enabled our patients and others to participate, collectively, in clinical trials that offer the possibility of lifesaving new treatments and interventions. Your kindness means that our patients receive not only the best care possible but also a reason to hope for a better future, and the chance to reach their full potential. **Thank you.**
